# Introduction

Each Waltco liftgate is manufactured to stringent quality standards for years of reliable service. To ensure maximum performance of your Waltco liftgate, always specify and use “OEM Parts” from Waltco.

This manual does not provide procedures for the servicing and repair of Waltco liftgates. Service and repair should only be performed by an authorized Waltco distributor. For information on the nearest authorized Waltco distributor contact:

**Waltco Lift Corp.**

285 Northeast Avenue

Tallmadge, OH 44278

Phone: 800.411.5685

Fax: 800.411.5684

E-mail: [parts@waltco.com](mailto:parts@waltco.com)

**The use of non-standard or makeshift parts can be extremely hazardous and result in serious injury or death.**

**Every vehicle that has a WALTCO Liftgate must have legible WARNING AND OPERATION DECALS clearly posted on the vehicle and an OWNER’S MANUAL in the vehicle at all times as a guide for proper operation and maintenance.**

# How To Order Parts

**Repairs should be made only by authorized mechanics using WALTCO Replacement parts.**

When ordering repair or replacement parts, please include all the information asked for below. If this information is not available, a complete written description or sketch of the required part will help WALTCO identify and deliver the needed part to you.

---

## THE FOLLOWING INFORMATION MUST BE INCLUDED:

1. SERIAL NUMBER - [WALTCO liftgate serial numbers can be found on the Specification Tag attached to the mount frame. (On older units the Specification Tag is located on the side or bottom of the platform.)]
2. MODEL NUMBER - [Or capacity]
3. PLATFORM SIZE

---

## THEN INCLUDE THE FOLLOWING INFORMATION:

4. PART NUMBERS
5. DESCRIPTION
6. QUANTITY REQUIRED

---

## MAIL, E-MAIL OR PHONE YOUR REQUEST TO:

Waltco Lift Corp  
285 Northeast Avenue  
Tallmadge, OH 44278  
1-800-411-5685  
FAX: 1-800-411-5684  
E-MAIL: parts@waltco.com

**ALL PARTS ARE F.O.B. FROM THE SHIPPING FACTORY**

---

## PLEASE NOTE:

**To assure you of continuing and effective quality control, our warranty policy permits replacement of hydraulic cylinders, valves and motor pump units when their factory seals are intact. Parts under warranty will be exchanged promptly after careful inspection of the returned assemblies.**

---

# Model Information

## Explanation of Specification Tag

BZ33 G7	Level Lift	3300 lbs.
BZ44 G7	Level Lift	4400 lbs.

**MODEL NUMBER**

**RATED CAPACITY**  
Based on an evenly distributed load on the platform flat surface.

**SERIAL NUMBER**  
of liftgate. To be used when ordering parts or when contacting Waltco for service or warranty questions

**DATE OF MANUFACTURE**  
Month / Year

GR00241

## LOCATION OF SPECIFICATION TAG

Can be found on driver's side, end of mount tube.

GR02226

# Decals

## INSTALLATION OF CONTROL DECALS

Install all decals listed below. Be certain they are installed in the proper location and are legible.

 All decals must be in place and legible or all warranties are void.

Each of the following four (4) decals are to be positioned in a conspicuous place near the control switches as shown.

80100850 – Safety Instruction Decal

80101451 – Operation Decal

80100828 – Important Decal

80101370 – Hazard decal

One (1) of the following three (2) decals is to be positioned in a conspicuous place near the control switches as shown.

80101415 – BZ-33 Capacity Decal

80101416 – BZ-44 Capacity Decal

 **If your liftgate is equipped with dual controls, an additional Safety Instruction decal (80100850) is to be placed in a conspicuous place near the second set of controls.**

To maximize decal adhesion to surfaces:

- Surface must be dry and clean
- Firm pressure must be applied to decal
- Minimum surface temperature 65°  
Heat gun may be used to heat surface

PLACE DECALS IN THIS AREA

GR02913

## INSTALLATION OF DRIVE-OVER WARNING DECAL

The following decal is to be positioned in a conspicuous place near the control switches as shown.

80100592 – Drive Over Decal

 **If unit is equipped with drive over kit decal 80101330 must be used in place of decal 80100592.**

GR02913A

# Decals

## INSTALLATION OF PLATFORM DECALS

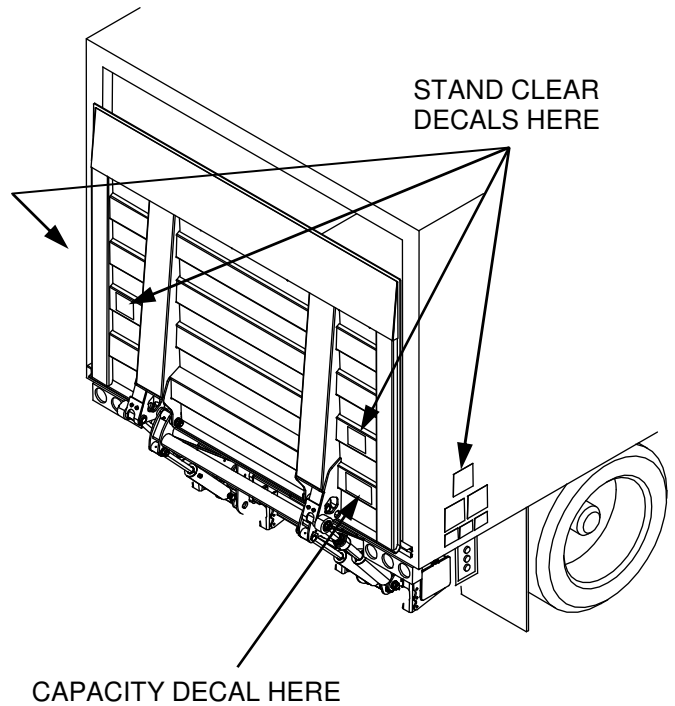

The following decals are to be placed on the underside of the platform and both sides of vehicle as shown.

75089296 – Stand Clear Decal (4)

One (1) of the following three (2) decals is to be positioned in a conspicuous place on the bottom of the platform as shown

80101415 – BZ-33 Capacity Decal

80101416 – BZ-44 Capacity Decal

GR00511

## INSTALLATION OF SAFETY TAPE

Tape (Z20290) is to be placed on the sides of platform so it is visible from the side and back of vehicle as shown.

**IMPORTANT!** Safety tape must wrap around side of platform as shown.

**IMPORTANT!** Safety tape must wrap around side of platform as shown.

GR00511

# Decals

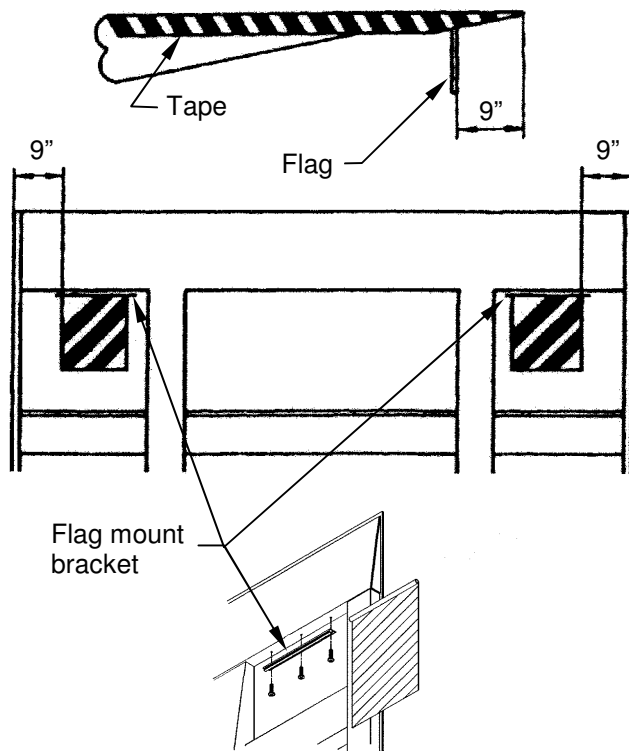

## SAFETY TAPE AND FLAGS

Tape (Z20290) is to be placed on the sides of platform so it is visible from the side.

Locate corner flag mount brackets (Z20273), one on each side of platform and drill (3) holes per bracket into platform as shown. Use bracket as a template.

Using slotted head screws provided (three per bracket), install flag mount brackets as shown.

Slide flags (75089905) into mount brackets and crimp ends of each bracket to prevent flags from sliding out.

GR00043 & GR01761

## SHUT-OFF DECAL

The following decal is to be placed next to the liftgate shut-off switch as shown.

75089267 – Liftgate Shut-Off Decal

GR00121

## CIRCUIT BREAKER DECAL

The following decal is to be placed next to the liftgate circuit breaker as shown.

80100829 – Circuit Breaker Decal

GR00122

# Electrical Information

## Electric and Hydraulic Diagram

# Electrical Information

## Electric and Hydraulic Diagram (with Auto-tilt)

# Electrical Information

## 3-Button Control Unit (Permanent)

Note: The permanent switch control box comes with a resistor heater wire. It is recommended that this wire be removed and not used.

Install the main gate control in control bank 1.

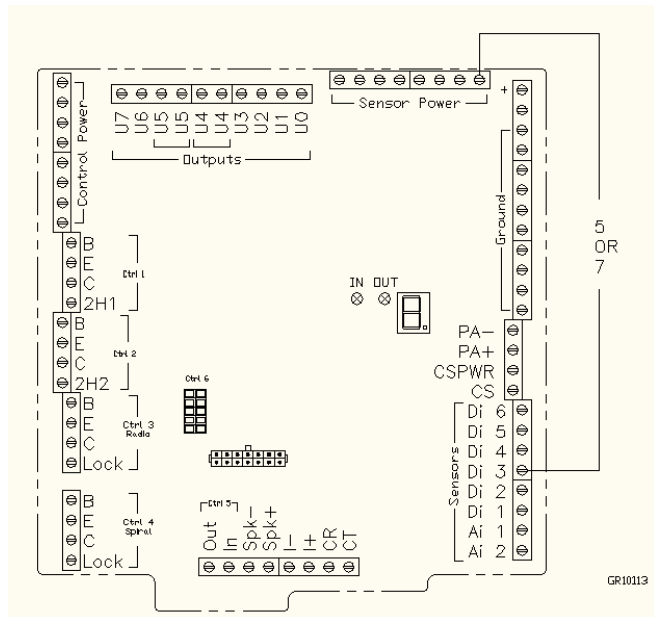

NOTE: For units without a 2 hand switch, connect a jumper between C and 2H1 in control bank 1.

## 3-Button Remote Switch (Spiral Cord)

Install the main gate control in control bank 4.

# Electrical Information

For units without an inside of deck mounted angle sensor, verify there is a Green or Red jumper wire installed between "Sensor Power" and Di 3 terminals on circuit board.

## Cable lead-through

In order to be able to install/remove/adjust the cables in the cable grommet, its protective cover must be removed and the five screws loosened.

Remove the protective cover fastened with three screws on the cable grommet.

Loosen the five screws on the cable grommet. Cables can now be installed/removed/adjusted in the grommet.

On installation, the cable must be installed together with existing cabling with cable ties. Ensure the length of the cable is sufficient for moving the control card. The outer sheathing on cable connected to the control card must be stripped 10 inches.

Once all the cables are in their appropriate places in the grommet, retighten the five screws.

Install the protective cover on the cable grommet with the three corresponding screws.

GR03025

# Electrical Information

## Hydraulic unit and control card

The lift's hydraulic unit and its control card are installed inside the lift's frame. For access during installation, service and repair, for example, the protective cap needs to be dismantled and the hydraulic unit pulled a little way out of the frame.

To access the control card, follow steps 1 to 3; refitting is performed in reverse order. To access the hydraulic unit and oil tank, follow steps 1 to 6; refitting is performed in reverse order.

1. Remove the protective cap, which is secured with two quick-release locks.
2. Disconnect the hydraulic unit, which is secured with two bolts.
3. Pull out the hydraulic unit approx. 6 Inches to access the control card.
4. Remove the control card, which is secured with one wing nut.
5. Carefully place the control card to one side. Ensure that no cables are damaged.
6. Pull the hydraulic unit further out until the tank cap is accessible,

\*\* 0.2 second delay at output signal.

# Electrical Information

## Restriction of use of control device

Image 1. Use of radio control device limited by the platform angle.

## Sensor

Name	Position (standard)	Function	Description
Di1	Lift arm	Angle sensor	For autotilt, safety function.
Di2	Platform Module	Angle sensor	For autotilt, platform angle. There is some trimming allowance for the bracket in the platform in order to facilitate adjustment of the platform's autotilt angle.
Di3	Platform Module	Angle sensor	Non-actuated Di3 disables Tilt up with the secondary control device so that the operator must use the two-hand button - 2H along with the primary control device in order to continue to maintain the tilt up function.
Di4	Tilt cylinder	Open platform alarm	Pressure sensor for falling pressure connected to +side of tilt cylinder. In the actuated state, returns the connection signal (+) to Di4 and results in output signal (-) at Pa-. Also phase (+) signal out at Pa+. 60 Bar.
Di5	Lift cylinder	Pressure sensor	For autotilt. 1.2 Bar.
Di6	Control card	Jumper	Jumper for deactivation of Autotilt functions in event of up and down movement.
Cs	Cabin	Activation	No signal in at Cs results in blocked control device terminals. Signal to Cs usually comes from the cabin switch. In individual cases where the cabin switch is not used, the (+) signal comes in to Cs jumpered from (CS PWR) on nearby terminal.
2H	Control devices	Two-hand button	Activated in connection with opening and closing of vehicle body. Used for Quick opening.

# Electrical Information

## Connection unit

### Power save mode

If the control card is not used for approx. 5 minutes, it goes into power save mode. Press any control button for approx. 0.5 seconds to “wake up” the control card again.

### Operating information

All the lift’s functions are controlled and monitored through the control card, which is equipped with an alphanumerical display with a flashing light and 2 red LEDs. These display current operating information. In the event of any operational disturbances, fault codes are displayed to facilitate troubleshooting.

#### The display indicates:

- Active control device
- Fault display
- Program configuration
- Sensors’ current status

#### The flashing light indicates:

- Supply voltage
- Off: No supply voltage
- On: Supply voltage available but CS (cabin switch) is not active.
- Flashing: CS (cabin switch) is active, the system is awaiting input signal.

#### LED 1 indicates:

- Active input, button(s) on control device pressed.

#### LED 2 indicates:

- Active output (approved input signal from control device and sensors), the lift is operated.

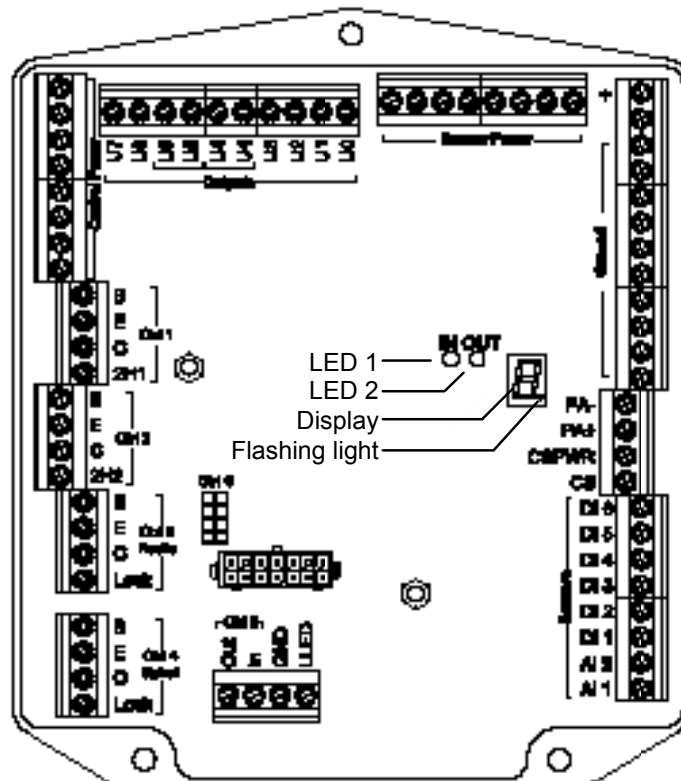

Image 2. The control card is equipped with an alphanumerical display with a flashing light and 2 red LEDs

# Electrical Information

---

## Information codes

Codes are shown on the display in a sequence. First a letter for identification of information, followed by figures or segments for further information and then ending with a pause:

When the CS (cabin switch) is switched on, the current program configuration (P) is displayed first, followed by configuration number. The number of volts detected is then displayed and, after this, the current software version (J), followed by version number.

As long as no control device is used, a scrolling sequence is then displayed, with sensor indication (C), followed by 0-6 segments showing which sensors have a signal.

When a control device is used, the control device being used (1-7) is displayed, followed by which button has been pressed, segments B, C, E or X (X symbolises the 4th button on the respective control device (2h1 for fixed control device 1, 2h2 for fixed control device 2, lock knob for radio control device and coil control device)).

The control devices are symbolised by the figures 1-7.

1. Fixed control device 1, including two-hand button 2h1
2. Fixed control device 2, including two-hand button 2h2
3. Radio control device, External
4. Coil control device
5. Truck slider control device
6. Radio control device, internal module
7. CS (cabin switch)

Once a button has been released, the control system for the current control device is locked for a while to ensure that no other person operates the lift from another control device. During the period the control system is locked for the current control device, its number (1-7) will flash on the display. This primarily applies to radio and coil control devices, as other control devices have such a short locking period that there is hardly time to see the indication.

Coil control devices can be equipped with a locking function. Once the control device has been used, the control system is locked for the current control device until it is unlocked manually from the respective control device's deactivation button. With some configurations, however, the coil control device can, for safety reasons, always tilt the platform down in the event of the operator getting shut inside.

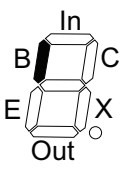

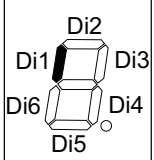

The radio control device is also equipped with a locking function. The control system can then be locked/unlocked by pressing and holding button 5. The lock's status is indicated by the locking function LED, which comes on when the lock is activated. In the event of a fault in the remote control, unlocking can be performed by turning the control power (CS) Off/On.

If the remote control is in the locked position and the lift has been unlocked by turning the control power (CS) Off/On, the lift will be locked again as soon as any button on the remote control is pressed.

### **NOTE.**

The lift remains locked if it loses power and is then started up again, and the number 6 flashes on the control card's display. Unlocking is performed as described above.

# Electrical Information

Information codes					
Identification	Code 1	Code 2	Code 3	Information	Other
P (Program configuration)	00-99			Cancelled configuration	
		-		Dividers	
			12/24	Number of volts detected	
J Software version	01-99	_	1-9	Version number	
1-6 (Fixed light) Active control device while operating	1-6			Fixed light (1-6) displays active control device during operation.	
		Segment B, C, E or X.		Segments B, C, E or X are illuminated depending on which button is pressed	
1-7 (Flashing) The control device for which the control system is locked for a while after completed operation.	1-7			<p>Control device for which the control system is locked.</p> <p>This primarily applies to radio and coil control devices, as other control devices have such a short locking period that there is no time to see the indication.</p> <p>The number will stop flashing when one of the current control device's buttons are pressed.</p> <p>If the control card has been without voltage and receives the voltage again when the CS (cabin switch) is switched on, "7" will flash on the display and the control card is locked until the Off/On on the CS is operated.</p> <p>1-6 = Ctrl 1-6 7 = CS</p>	
C Sensor indication	Segment			<p>1-6 segments indicate sensors.</p> <p>On - signal in.</p> <p>Off - no signal in. 0V.</p> <p>(See electrical and hydraulics diagrams for information about the location of the sensors).</p>	

**Example of sequence of information codes:**

Program configuration: 01, Voltage detected: 12V, Software version: 09

**Example of sequence with sensor indication:**

Sensor indication: C, Detected sensor: Di1

**Example of sequence with control device indication:**

Control device: 2, Detected button: B

# Electrical Information

## Fault codes

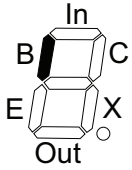

If a fault arises, the fault code is shown in the display in the form of a letter for identifying the fault, followed by numbers and/or number segments for further information, followed by sensor indication (C) in accordance with the previous page.

In fault codes E, F and U, the numbers (1-9) show which control device/output the fault code refers to.

1. Fixed control device 1, including two-hand button 2h1
2. Fixed control device 2, including two-hand button 2h2
3. Radio control device, External
4. Coil control device
5. Truck slider control device
6. Radio control device, internal module
7. CS (cabin switch)
8. Control Power
9. Sensor Power

If the system discovers several faults, only the fault code for the fault with the highest priority will be shown automatically. The display is prioritised in the order in the table below, L/H, E, F and A.

When the CS is switched off, the system will browse through a list containing the five most recent faults detected before the display goes off after approx. 5 minutes, the control card then goes into power save mode.

Fault codes					
Identification	Code 1	Code 2	Code 3	Information	Other
L Low battery voltage	07-35			Voltage measured	
H High battery voltage	07-35			Voltage measured	
E Control device locked	1			Fixed control device 1 (incl. two-hand button 2h1 if they are monitored)	
	2			Fixed control device 2 (incl. two-hand button 2h2 if they are monitored)	
	3			Radio control device, external	
	4			Coil control device	
	5			Truck slider control device	
	6			Radio control device, internal module	
	7			CS (cabin switch)	
			Segment		

# Electrical Information

Fault codes					
Identification	Code 1	Code 2	Code 3	Information	Other
F Output short-circuited/high current	0-9			Which output has short-circuited/has high current. Fault code is reset automatically if the function in question is running (function verified).	1-7 U0-U7, displayed only after the respective output/function has been active. 8 Control power 9 Sensor power
Output not connected/cable breakdown	0-7			Which output is not connected/has cable breakdown. Fault code is reset automatically if the function in question is running (function verified).	Displayed only after the respective output U0-U7 has been active.
A Internal fault	0-				Contact support if the lift does not function.

All fault codes can be reset manually by switching Off/On the CS (cabin switch). Fault codes F0-F7 and U0-U7 are reset automatically if the function in question is running (function verified). Fault codes L and H are reset automatically if the battery voltage becomes correct. Fault code E is reset automatically if the control system has not received any signal from the relevant control device for 6 minutes.

## Example of sequence of fault codes:

Output No. 3 short-circuited.

## Control devices

If a control device button is held down for too long, the control device is blocked and cannot be used for a number of minutes. Fault code E flashes on the display. The fault is also indicated on a non-active coil control device with a lock button, if this is connected to Ctrl 4. The LED on the coil control device then flashes the same number of times as the number on the control device in question, see the list in section "11.2.2 Fault codes" on page 8.

**Example:** Control device 2 is blocked, the LED on the coil control device then flashes twice, goes out for a moment, flashes twice again, etc.

Coil control device's LED	
Fixed light	The coil control device is active
Extinguished (weak glimmer)	The coil control device is not active
Flashing	One of the other control devices is blocked

# Electrical Information

---

## Supply voltage

The illustrations below show the desired supply voltage for 12V and 24V systems. Specified voltage refers to voltage when the lift is operated. See also section "16.2 Maximum power consumption - Minimum recommended conductor cross sectional area" on page 12.

- ✘ The lift is not working.
- ! The lift is working but is issuing a warning. This voltage range is only recommended for emergency operation.
- ✓ The lift is working, but the voltage range outside the 'heart-marked' area is only recommended for operation for short periods.
- ♡ The lift is working within the voltage range for optimum function and service life.

**Every vehicle that has a WALTCO Liftgate must have legible WARNING AND OPERATION DECALS clearly posted on the vehicle and an OWNER'S MANUAL in the vehicle at all times as a guide for proper operation and maintenance.**

Additional WARNING DECALS, OPERATION DECALS and OWNER'S MANUALS can be obtained from WALTCO LIFT CORP.

---

**NOTE:**

**When ordering, give model  
and serial number of the liftgate.**

---

# ***IMPORTANT***

## **KEEP THIS OWNER'S MANUAL IN THE VEHICLE**

### **WARNING**

**Improper operation and maintenance of this liftgate could result in severe personal injury or death.**

**Read and understand the contents of this manual and all warning and operation decals before operating and/or performing maintenance on this liftgate.**

**For SAFETY information on this liftgate see  
Chapter 1 of this manual**
